

# ASHEA HEAD START PRESCHOOL

The Ashea Head Start preschool replaced a daycare located in an existing CHMC funded residence. The preschool was built in part by community carpenters and labourers and is located in the heart of the Kwanlin Dun First Nation Village. As part of the Headstart program, the building provides a secure nurturing environment for Kwanlin Dun First Nation children. The Activity Area, Classroom and deck areas orient toward outdoor play areas, an existing boreal forest and south exposure: the need to connect with the residential neighbourhood and the ever changing natural site.
