

WHITEHORSE, YUKON

# ADAM McCLELLAN HOUSE

Owner constructed in 2003, the three bedroom single level home provides an open and modest single family residence and future retirement home. With its east-west orientation the dwelling opens to the south to maximise both solar gain and views of the site. The living and sleeping programme areas are connected by an entry lobby that provides an immediate and direct link to the site. Natural light is captured and redirected deep in the north side of interior spaces.
