

WHITEHORSE, YUKON

# BLING

Kobayashi + Zedda Architects designed Bling Urban Dwellings to combine the best qualities of an urban loft and a walk-up townhouse. Bling Urban Dwellings offered 18 residences with a variety of design options including ground level access, walk-up and penthouse suites. The project increased the typical area density 6 fold and while providing a comfortable and open urban feel.

The buildings are all oriented to the south maximising daylight and views from to the surrounding city and mountains. The building was constructed by Zeko Design Build and made use of xeriscaping and energy efficient design and construction.
