

LA GUARDERIE DU PETIT

WHITEHORSE, YUKON

CHEVAL BLANC

Kobayashi + Zedda Architects designed the 350 square metre French language daycare around 1995. A second phase of construction was completed in 2002 to meet the growing demand for space. The daycare features a radiant in-floor heating system providing warmth for the toddlers that attend, as well as large south facing windows to utilize maximize solar gain and natural light. With the assistance of the existing daycare staff, a colour scheme was chosen to arouse creativity among the children.
