

# LEPAGE URBAN PARK RENOVATION

WHITEHORSE, YUKON

LePage Park is centrally located in downtown Whitehorse and acts as gathering and presentation space for the local arts community throughout the winter and summer. The park is used daily in the summer for performances and gatherings and the design of the renovations sought to provide performance space as well as to update the surrounding landscaping. Local artists were hired to assist in the design of the mosaic finish of the presentation platform. Raked seating and local vegetation provide a backdrop to this vibrant community gathering space.
