

The new Mt. Sima ski lodge replaces an ad hoc collection of trailers with a building that meets the current and future needs of the Great Northern Ski Society. Constructed for the 2007 Canada Winter Games, the building also provides a third level banquet facility and meeting room. KZA donated a portion of professional services towards the project. Local materials and durable design, along with ample light create a community friendly and vibrant building for outdoor activities.

# SKI LODGE MT. SIMA
