

VANIER CATHOLIC SCHOOL CAFETERIA ADDITION

WHITEHORSE, YUKON

Kobayashi + Zedda Architects Ltd. designed a 434 square meter addition to the existing Vanier Catholic Secondary School cafeteria. Although a tight budget did not allow for enough seating for all students, the architects designed concrete bleachers where the overflow crowd can eat their lunch.

Two corner walls feature large windows, opening up the room to the outdoor sports fields and the natural woodlots on the perimeter of the school site.
