

The River's Edge

RIVER'S EDGE DEVELOPMENT MASTER PLAN

WHITEHORSE, YUKON

Kobayashi + Zedda Architects was retained by River's Edge Partnership (REP) to master plan a large parcel of waterfront land. With the transition of downtown land uses from industrial to residential / commercial, REP wanted to create a vibrant mixed use community. KZA identified key site amenities and prepared a development plan that included a combination of residential, commercial and recreational uses. The master plan maximizes the connection to the Yukon River, waterfront trail and trolley ensuring a pedestrian-scaled waterfront. Implementation of the plan began in 2010. KZA was also retained in 2010 to design the first of five buildings proposed for the area.
