

DAWSON TELEGRAPH OFFICE RENOVATION

DAWSON CITY, YUKON

As an example of Thomas W. Fuller's design significance in Dawson, the former Dawson City Telegraph Office will be restored and rehabilitated to both display its former glory and provide a useful and efficient modern facility. Kobayashi + Zedda prepared documents for the rehabilitation design and restoration that has continued since 1999. Recent construction included the interior renovation of the building including mechanical and electrical rough-in, insulation, and paneling re-installation. The building has been fully restored and is now occupied.
