
TOMBSTONE PARK
INTERPRETIVE PARK MASTER PLAN

WHITEHORSE, YUKON

Completed for the Department of Environment, Yukon Government, the Tombstone Territorial Park Interpretive Centre Master Plan was prepared by Kobayashi + Zedda to help implement a multi-year plan to establish more permanent interpretive and visitor facilities as a gateway to the park. With a goal to minimize ecological impact, the development master plan utilizes existing site amenities, disturbed areas and access routes. As an off-grid development, special attention was paid to integrate alternate forms of energy in sustainable building design. The plan was adopted in 2005 and construction completed in 2010.
