

Porter Creek Bench Charrette Concept "Whistle Bend"

Nov. 8, 2006

WHISTLE BEND SUBDIVISION CONCEPT / MASTER PLAN

WHITEHORSE, YUKON

Kobayashi + Zedda participated in the Whistle Bend Sustainable community charrette as part of a multi-disciplinary team to assess the opportunities and constraints toward the development of a new mixed-use subdivision to accommodate a 10,000 person community. Kobayashi + Zedda prepared the final concept plan used as the basis for the detailed design of phases 1 and 2. KZA worked with UMA Engineering to prepare the design guidelines and zoning regulations as part of the detailed design phase.

In 2011, KZA together with HB Lanark Golder, were retained to complete the detailed design for phases 3, 4 and 5. The current design process involves the review of design guidelines and zoning to better address sustainability goals.
