

CARCROSS RETAIL VILLAGE MASTER PLAN

WHITEHORSE, YT

Kobayashi + Zedda has been retained by the Carcross Tagish Management Corporation to prepare a master plan and oversee design and construction of the much anticipated Carcross Retail Village. With a total development area of over 20,000 square feet, the retail village proposes to establish a mixed-use commercial core reflective of the ever increasing tourist visits to the community during the summer season. With a shortage of services and accommodations, the retail village proposes to provide a venue for both thus enhancing the quality of the existing heritage fabric. Planning was completed in early 2011 with the implementation of phase 1 commencing in 2012.
